Priti Patil – a Letter of Recommendation

To Whom It May Concern:

This letter is to verify that Ms Priti Patil was employed by Acision LLC from March 2011 until December 2014, based in Richmond, VA, holding a position of a Lead Architect and working as a member of an international and geographically distributed team of principal product architects, managed by me as the Acision Design Authority.

As an expert Ms Patil interacted with Acision corporate customers and Acision entities worldwide; her responsibilities included (a) product requirement collection and definition, (b) creation of designs and technical documentation, (c) ensuring adherence to design principles by providing architectural leadership to a development team of 80 engineers, and (d) technical research and innovation.

During her employment as Lead Architect Ms Patil specialized in IP/SIP messaging solutions (including the emerging international standards for GSMA RCS/Joyn Rich Communication Services) and in architecting/designing of a telco messaging solution providing IP, text and multimedia messaging (currently known as Acision FuzeMe).

Ms Patil's breadth of technical scope and attention to detail, as well as an excellent ability to explain and discuss complex technical issues, made her a respected and valuable member of the Design Authority team; I felt privileged to have her onboard.

Feel free to contact me in case of any further questions regarding this employment.

Sincerely

Jiří A. Randus
